

AWQMS

goldsystems
INNOVATION THROUGH TECHNOLOGY

The Ambient Water Quality Monitoring Systems (AWQMS) is a replacement for the distributed EPA STORET database, which will be de-supported Fall of 2009. The AWQMS solution is a web-based water quality data management system that includes data import, data management, analysis, graphing, and data submission via an exchange network node client.

Data Input

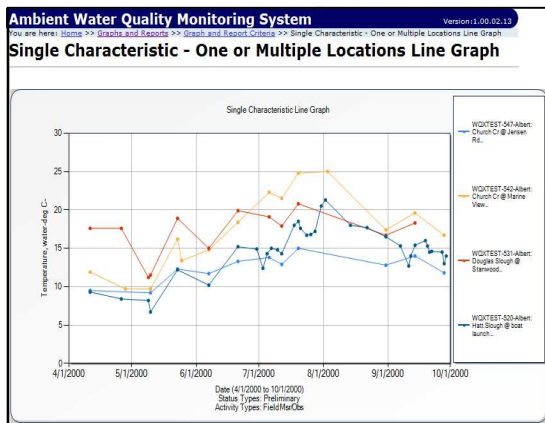

Import and Manual Data entry

- AWQMS has a robust data import module that imports data in flat file formats (.csv or .txt)
- AWQMS validates data imports to meet WQX v2.0 standards
- AWQMS has full data entry and edit pages for easy data management
- QA/QC can be performed against the secure local database before submitting to EPA
- Mass data updates can be performed with AWQMS to enable easy data correction

Column	Pick	Data Element	Default Value	Format	Translation Count
Remove 1		Project ID			0 Add/Edit
Remove 2		Monitoring Location ID			0 Add/Edit
Remove 3		Activity ID			0 Add/Edit
Remove 4		Activity Type	{none}		1 Add/Edit
Remove 5		Activity Media Name	{none}		0 Add/Edit
Remove 6		Activity Start Date		MM/DD/YYYY	0 Add/Edit
Remove 7		Activity Start Time		HH:MM	0 Add/Edit

Data Analysis

Data Analysis with Graphing

- AWQMS includes web-based graphing and statistical analysis tool. Graphs currently supported:
 - Box and Whisker
 - Bi-Variate Scatter plot
 - Line Graph
 - Bar Chart
- Built in statistical and exceedance reports
- AWQMS supports exporting the data from the graphs into Microsoft® Excel
- Additional graphs and reports are scheduled for addition in future releases of AWQMS

Data Output

Data Output in WQX XML format

- AWQMS provides easy submission of water quality data to EPA via the built in node client
- AWQMS supports complete, partial, and incremental data submissions
- AWQMS generates an XML file that conforms to the WQX Schema
- AWQMS can integrate with an existing node to flow WQX data to the EPA warehouse

AWQMS

goldsystems
INNOVATION THROUGH TECHNOLOGY

AWQMS is a STORET to WQX transition solution for many organizations including state, tribal, and volunteer water quality monitoring programs. AWQMS can be hosted in a secure offsite data center, or deployed locally and integrated with existing enterprise systems. AWQMS was developed for multiple programs using a community software development model and can be distributed at no cost.

Implementation

Implementation of AWQMS

OPTION 1 – Hosted (See Pricing below)

Have Gold Systems host AWQMS in a secure offsite data center

- No cost for the core AWQMS software
- Monthly hosting costs cover all hardware, database licenses, the .net graphing tool, and database administration costs
- 24/7 access to data, graphs, and reports with an internet connection and browser
- Updates and maintenance performed seamlessly on remote hosted servers

OPTION 2– Local Deployment

Deploy AWQMS code base on local servers and maintain the software and servers locally

- No cost for the core AWQMS software
- AWQMS can integrate with local Enterprise Systems and Exchange Network Nodes
- AWQMS supports both SQL server and Oracle databases
- Need to purchase hardware and licenses if not already in place
- Need to purchase license for graphing tool

Training

Training

- Gold Systems offers web-based training tutorials using www.LearningZen.com
- Gold Systems has worked with federal agencies, multiple states and over 60 tribes on water quality data management
- Contact Gold Systems to provide onsite trainings and remote support and assistance

Pricing

Pricing (see “Option 1 – Hosted” above)

- The hosting prices below will be offered in 1 year increments
- Hosting fees cover all license, hardware and database administration fees
- As more orgs sign up in a group economies of scale reduce the overall cost per organization
- Hosting can provide a secure, economical, and low maintenance option

Annual Hosting Organization Prices						
Organizations	Price per month	Yearly price	Set up Fee*	Total	Yearly Price per Org w/ out set up	Monthly Price per Org w/ out set up
1	\$300.00	\$3,600.00	\$600.00	\$4,200.00	\$3,600.00	\$300.00
Additional Org	\$100.00	\$1,200.00	\$200.00	\$1,400.00	\$1,200.00	\$100.00
≥ 20	Custom Pricing					

*The set up fee is a one time fee needed to create the organization, users accounts and preferences.
